

TRI WIBOWO CAHYO

SOC Analyst / Purple Team Practitioner — *I break things to learn how to defend them.*

Malang, East Java, Indonesia | 0823 2800 2098 | twibowo288@gmail.com | [LinkedIn](#) | [Portfolio](#)

SOC Analyst who learned to defend by first learning to attack. I triage alerts across **IBM QRadar, Cortex XDR, and Microsoft Defender** by day, and spend my off-hours rooting machines and building C2 tooling, then fold what I find back into detection. That loop is the whole point: I hunt better because I know what an attacker is trying to hide — writing manual AQL queries to catch the anomalies that rule-based alerts miss, rather than waiting for them. Self-taught from SMK to the SOC floor: **Top 5 Defensive / Top 10 Offensive in Indonesia** on the platforms I train on, with 60+ published writeups behind it.

EXPERIENCE

Security Analyst · PT Mitra Pinasthika Mulia (MPM Distributor)

Oct 2025 – Present · Hybrid

- Triage security alerts in IBM QRadar across a multi-entity enterprise environment, working **thousands of daily log events** down to the dozens of cases that actually warrant investigation in TheHive.
- Run **proactive manual threat hunting** beyond rule-based alerts — writing custom AQL queries to surface anomalies like unusual user agents, access to sensitive files, and other patterns automated rules miss.
- Built a **5W-based investigation framework** for TheHive SOAR (who/what/when/where/why) to keep case write-ups consistent and reviewable across the team.
- Investigate incidents across **Cortex XDR, Microsoft Defender for O365, and NDR** — phishing analysis, endpoint telemetry review, and web attack detection.

Red Team Intern · Hack Secure

Apr 2025 – May 2025 · Remote

- Built a **command-and-control lab** using Sliver and Starkiller, deploying implants across target VMs and running end-to-end adversary simulations.
- Documented each simulated attack into **assessment reports** with CVSS scoring and remediation written for both technical and executive readers.

L2 Support Engineer · PT Solusi247

Apr 2023 – Apr 2025 · Hybrid

- Provided L2 support for AI/ML platforms (Apache Airflow, Cloudera, Hadoop), debugging backend infrastructure with SQL, Bash, and Python.
- Performed **root cause analysis** on recurring platform issues — the analytical discipline I lean on every day in security investigations.
- Automated repetitive troubleshooting workflows while consistently meeting **SLA** targets.

SELECTED PROJECTS

A few of 10+ offensive and defensive builds. Full case board at trwbcy.github.io/portfolio.

Enterprise SOC Homelab — Full Stack on Open Source

- Built an enterprise-grade SOC replicating **\$500K+** of commercial tooling using 13 integrated open-source services across 5 VMs — Wazuh (SIEM), TheHive (SOAR), pfSense, Suricata + Zeek (NDR), ModSecurity (WAF), and Greenbone.
- Validated the full pipeline through adversarial testing: WAF blocks, NDR detects scanning, SIEM correlates, SOAR opens cases, firewall blocks IPs — every layer coordinating with **zero manual intervention**.

Astaroth-Style Red Team Campaign + Detection Engineering

- Executed a multi-stage fileless attack against a fully patched Windows 10 host with **0 Defender alerts**, chaining living-off-the-land techniques (mshta, wmic, certutil) under multi-layer obfuscation.

- Turned the attack into defense: wrote detection rules for each LOLBin stage, mapped the chain to **MITRE ATT&CK (T1218.005, T1027, T1105)**, and shipped a blue team implementation guide. This is the purple loop in one project.

Incident Response — Phishing-Triggered Fileless Execution

- First responder to a real-world mshta.exe execution triggered by phishing in a live enterprise environment — isolated the endpoint via XDR before formal escalation, collected Windows Event Log evidence, and handed off to L2.
- Incident contained without further escalation; documented the full timeline and MITRE mapping (T1218.005) into the internal case record.

TECHNICAL SKILLS

Detection & Response IBM QRadar (AQL, custom hunting) · Wazuh · Splunk · TheHive SOAR · Cortex XDR · MS Defender (Endpoint/O365) · Sysmon · PCAP · Detection Engineering · MITRE ATT&CK

Offensive Security Web App Pentesting (Burp, SQLMap, OWASP Top 10) · Active Directory (BloodHound, Mimikatz, Impacket) · C2 (Metasploit, Sliver) · LOLBin Abuse · Fileless Execution

Threat Intelligence IPinfo · VirusTotal · AbuseIPDB

Infrastructure Python · Bash · PowerShell · SQL · Git · Docker · AWS (EC2, S3)

ACHIEVEMENTS & RECOGNITION

- **60+ technical writeups** (36 offensive + 29 defensive) on exploitation, forensics, malware RE, and incident response.
- **TryHackMe** — Rank **#5 Indonesia**, 100,000+ points across pentesting and web app security.
- **Hacktrace Ranges** — Defensive **#5** / Offensive **#7** in Indonesia.

CERTIFICATIONS

- **2025** — Certified Blue Team Practitioner (CBTP, Merit) · Certified Network Security Practitioner (Merit) · Certified API Security Practitioner (APISEC University) · Red Team Internship (HackSecure)
- **2024** — Practical Ethical Hacking · Practical Web Application Penetration Testing · Practical Web Hacking (all TCM Security)
- **2023** — IT Support Specialist (Google)

EDUCATION & CONTINUOUS LEARNING

Practical SOC Analyst Associate (PSAA) · TCM Security *2026 – Present (In Progress)*

Phishing analysis, network traffic analysis, threat intel, SIEM operations, digital forensics, and incident response.

SMK Diponegoro Tumpang · Teknik Komputer Jaringan (Computer Network Engineering)

- **IT Division Head, Student Council (2 yrs)** — led school-wide technology initiatives and IT infrastructure management.
- **IT Support Technician Intern, ITN Malang (6 mos)** — campus network systems support and maintenance.
